### What You Should Know About Your Auto; How To Drive and Keep It

Expert Advice How to Keep Automobiles Running Smoothly and the Best Way to Remedy Machine Trouble—Traffic Suggestions and Pleasure Routes for Evening World Readers.

By GEORGE H. ROBERTSON.

FTER countless experiments New York street traffic is far from being properly regulated. There have been frequent periods of fire early to-day in the five-story improvement, but the ever increasing stream of traffic, both tenement at No. 1787 Madison Ave- the United States, will talk on the pleasure and commercial, makes the

city's streets far from satisfactory. The creation of a traffic commisstreet traffic seems to be-the only

cially in the badly congested streets around the water front, are becoming unbearable. A traffic commission could rectify these conditions with the

which is very injurious to the engine.
P. U.

You will find that removing carbon by oxygen or oxy-acetylens process works out very satisfactorily, being rapid as well as inexpensive. As to warping the cylinders, such a risk is absolutely non-existent under conditions brought about by the use of this process, as the temperature of the burning carbon is low in comparison with that of the burning gaseline and air when the engine is running.

Try soaking the boil you mention with kerosene for half a day. If this fails (2) This is, in all probability, due to

Try soaking the boilt you mention with kerosene for built a day. If this fails to loosen it try beating it with a bow torch, but first be sure that the gas-bline is shut off and that none is left in the carburetor.

Automobils Edisor:

On a Bosch or Splitderf magneto when same goes dead and the spark plugs have been properly disanced and spaced, the wires in good condition, no short circuit and the platinum points filled and times, what is the best remedy?

Assuming that the spark plugs.

The sing preduct or perhaps to the throttle further. (2) Probably caused by "missing" due to ignition the directors has caused a split in the carburetor. (4) Have motor examined for carbon, and spaced, the wires in good condition, no short circuit and the platinum points filled and times, what is the best remedy?

Assuming that the spark plugs.

Assuming that the spark plugs, must be in the following:

boiders cracked, brushes dirty or
worn so that no contact is made,
safety gap short circuited, magneto
very weak. If none of the above
there is left only the primary and
coordary armature coils.

bosoble Editor:

Although I am not theroughly
familiar with the terms of the new
Motor Vehicle Law, it is my belief
that all persons owners included,
there is left only the primary and
there is left o wires, interrupter and all adjust-ments are in good shape, the trouble must be in the following: Brush holders cracked, brushes dirty or

me, summened me to court and I was fined \$13. Had the Judge a right to do this?

The law states that eighteen is the minimum age of drivers of motor vehicles. Really think the case should be taken to the United States SN.
